

Job Information: Head Veterinary Doctor (Postdoctoral position)

Closing Date: 15 December 2013

Employment Start: By mutual agreement

Contract Length: 3 years, prolongation possible

Institution: Axon Neuroscience SE, Bratislava

Department: Centre for Diagnostic and Validation Platforms

Job Description: A postdoctoral position is available at Slovak biotechnological company Axon Neuroscience SE. Centre for Diagnostic and Validation Platforms focuses on development of novel animal models for Alzheimer's and Parkinson's disease.

The successful candidate will perform and oversee veterinary activities in our rodent facility, oversee the breeding plan and its accurate fulfilment, coordinate the technical staff and assume responsibility for work safety and hazard protection.

For the scientific part, the candidate should have a strong background in neuroscience and expertise in transgenic technologies (pronuclei microinjections), embryofreezing and embryotransfer.

Contact Information: Doc. MVDr. Norbert Žilka, PhD.
