

The **University of Veterinary Medicine Vienna** invites for applications for **six doctorate or PhD positions** in a newly established graduate school for **pig and poultry medicine**.

**Project:** The focus is on preventing infectious diseases in pigs and poultry (PaP). In a first stage six individual projects were selected.

**Opportunities:** The successful applicants will join a multidisciplinary experienced team of experts in infectious diseases of pigs and poultry. Candidates will have the opportunity to gain skills in a wide spectrum of in vivo studies and laboratory techniques, by collaborating with renowned international research teams.

**Requirements:** Completed master study in veterinary medicine or life sciences. Interest in infection biology and laboratory/experimental work is required. We are looking for independent, responsible and team-oriented candidates with excellent communication skills in spoken and written English.

**Duration and funding:** 3-year contract. The salary will be in accordance with Austrian university guidelines. The collective agreement for employees at universities according to the classification given above is EUR 1.921,5 gross per month. The positions are available from October 2013 onwards.

**Application:** For information on applying and projects see <http://www.vetmeduni.ac.at/en/research/young-scientists>
