Description of the practice:

- In line with the study plan of the Animal Science study programme, student in the 2nd year of study is obliged to complete certain number of professional practice hours under supervision of experts from the field and/or private veterinary doctors outside the University of Veterinary Medicine and Pharmacy in Košice at a facility chosen by the student
- When completing professional practice with private veterinary surgeons, students should get acquainted with the administration of veterinary activities (keeping records of preventive activities and interventions, prescriptions, using and dispensing veterinary pharmaceuticals) and with performance of professional activities (diagnostic, preventive and therapeutic procedures within the field and outpatient practice)
- Conditions, organisation and acquirement of professional practice are arranged individually by the student. University of Veterinary Medicine and Pharmacy in Košice takes no responsibility for any incident occurring during the practice nor provides the student with insurance covering the practice
